Patent No. 6565866
GERBEAL INFORMATION:
APPLICANT: SCHIKY, Yasir A.W.
APPLICANT: Scholler, John
TITLE OF INVENTION: COMPOUNDS AND METHODS FOR TREATMENT A TITLE OP INVENTION: DIAGNOSIS OF CHLAMYDIAL INFECTION
FILE REFERENCE: 210121.469C6
CURRENT FILING DATE: 2000-06-20
NUMBER OF SEQ ID NOS: 357
SOFTWARE: PastSEQ for Windows Version 3.0/4.0
SEQ ID NO 190
LENGTH: 1006
LENGTH: 1006
TYPE: PRT
CORGANISM: Chlamydia
US-09-598-419-190

US-09-620-412C-176
| Sequence 176, Application US/09620412C
| Patent No. 6448234
| GENERAL INFORMATION:
| APPLICANT: Steven P. Fling
| TILE OF INVENTION: COMPOSITIONS AND METHODS FOR
| TILE OF INVENTION: DIAGNOSIS OF CHLAMYDIAL INFE;
| PILE REPRENCE: 210121-469C7
| CURRENT APPLICATION NUMBER: US/09/620,412C
| CURRENT FILING DATE: 2000-07-20
| NUMBER OF SEQ ID NOS: 363
| SEQ ID NO 176
| LENGTH: 982

| Sequence 17. Application US/09542520
| Patent No. 6887843
| GENERAL INFORMATION:
| APPLICANT: Jackson, W. James
| APPLICANT: Pace, John L.
| TITLE OF INVENTION: CHLAMIDIA PROTEIN, GENE SEQUENCE AND USES THEREOF
| TITLE OF INVENTION: CHLAMIDIA PROTEIN, GENE SEQUENCE AND USES THEREOF
| CURRENT PAPLICATION NUMBER: US/09/542,520
| CURRENT PILING DATE: 1998-10-01
| NUMBER OF SEQ ID NOS: 41
| SOFTWARE: PatentIn Ver. 2.0
| SEQ ID NO 17

; Sequence 169, Application US/10197220
; Patent No. 6919187
; GENERAL INPORMATION:
; APPLICANT: Bhatia, Ajay
; APPLICANT: Guderian, Jeff
; APPLICANT: Skeiky, Yasir A. W.
; TITLE OF INVENTION: COMPOUNDS AND METHODS FOR TREATMENT;
; TITLE OF INVENTION: COMPOUNDS OF CHLAMYDIAL INFECTION
; FILE REFERENCE: 210121.515C3
; CURRENT APPLICATION NUMBER: US/10/197,220
; CURRENT FILING DATE: 2002-07-15
; NUMBER OF SEQ ID NOS: 175
; SEQ ID NO 168
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 664

US-09-198-452A-478
US-09-198-452A-478
Sequence 478, Application US/09198452A
Patent No. 6552294
GENERAL INFORMATION:
APPLICANT: GATIffals, R.
TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragmente
TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preve
TITLE OF INVENTION: and treatment of infection
TITLE OF INVENTION: and treatment of infection
TITLE OF INVENTION: 1999
CURRENT APPLICATION NUMBER: US/09/198,452A
CURRENT FILING DATE: 1998-11-24
NUMBER OF SEQ ID NOS: 6849
SEQ ID NO 478
LENGTH: 949

    Sequence 472, Application US/09198452A

Sequence 472, Application US/09198452A

Patent No. 6559294

GENERAL INFORMATION:

APPLICANT: Griffals, K.

TITLE OF INVENTION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments

TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preve

TITLE OF INVENTION: and treatment of infection

FILE REFERENCE: 9710-003-999

CURRENT APPLICATION NUMBER: US/09/198,452A

NUMBER OF SEQ ID NOS: 6849

SEQ ID NO 472

LENGTH: 927

US-09-612-402B-15

Sequence 15. Application US/09612402B

Patent NO. 6642023

GENERAL INFORMATION:

APPLICANT: Jackson, W. James

APPLICANT: Dace, John

ITILE OF INVENTION: Chlamydia Protein, Gene Sequence and Uses Thereof

Patent NO. 6642023

FILE REPERENCE: 7969-086-999

CURRENT APPLICATION NUMBER: US/09/612,402B

CURRENT FILING DATE: 2000-07-06

PRIOR FILING DATE: 1997-10-02

NUMBER OF SEQ ID NOS: 43

SOFTWARE: PatentIn version 3.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 16, Application US/09612402B
| Patent No. 6642023
| GENERAL INFORMATION:
| APPLICANT: Jackson, W. James
| APPLICANT: Jackson, W. James
| APPLICANT: Jackson, W. James
| APPLICANT: Pace, John
| TITLE OF INVENTION: Chlamydia Protein, Gene Sequence and Uses Thereof
| PATENTE OF INVENTION: Chlamydia Protein, Gene Sequence and Uses Thereof
| Patent No. 6642023
| FILE REFERENCE: 7969-086-999
| CURRENT PEPLICATION NUMBER: US/09/612,402B
| PRIOR APPLICATION NUMBER: 08/942,596
| PRIOR APPLICATION NUMBER: 08/942,596
| PRIOR PILING DATE: 1997-10-02
| NUMBER OF SEQ ID NOS: 43
| SOPTHMER: Patentin version 3.0
| SEQ ID NO 165

; Patent No. 6448234
; GENERAL INFORMATION:
; APPLICANT: Steven P. Pling
; TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR TREATMENT AND
; TITLE OF INVENTION: DIAGNOSIS OF CHLAMYDIAL INFECTION
; FILER REFERENCE: 210121.46977;
; CURRENT APPLICATION NUMBER: US/09/620,412C
; CURRENT FILING DATE: 2000-07-20
; NUMBER OF SEQ ID NOS: 363
; SOFTHARE: FastSEQ for Windows Version 3.0/4.0
; SEQ ID NO 176

LEAGTH: 982
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Length 982;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              DB 2;
